

VERITAS

Vendor Evaluation, Requisition, Integration, Tracking, and Audit System

Like Amazon for Internal Procurement

Custom Workflows

adaptable Workflow-driven
authorization

Fully Tracked

Real-time status visibility

Data-Driven Analysis

Budget insights & Vendor
reliability scoring

Auditable

Immutable audit trail

The Problem: Dark Silos

Fragmented Data

Email threads, PDFs,
spreadsheets - no unified
system

Stale Information

Budgets checked manually
without real-time updates

No Historical Data

Vendor reliability unknown
at decision time

Audit Overhead

Manual email archaeology
for compliance reports

The Phantom Liability

15%

Quote-to-Invoice
Variance

Approved quotes
routinely exceed by
5-20%

100%

Visibility Gap

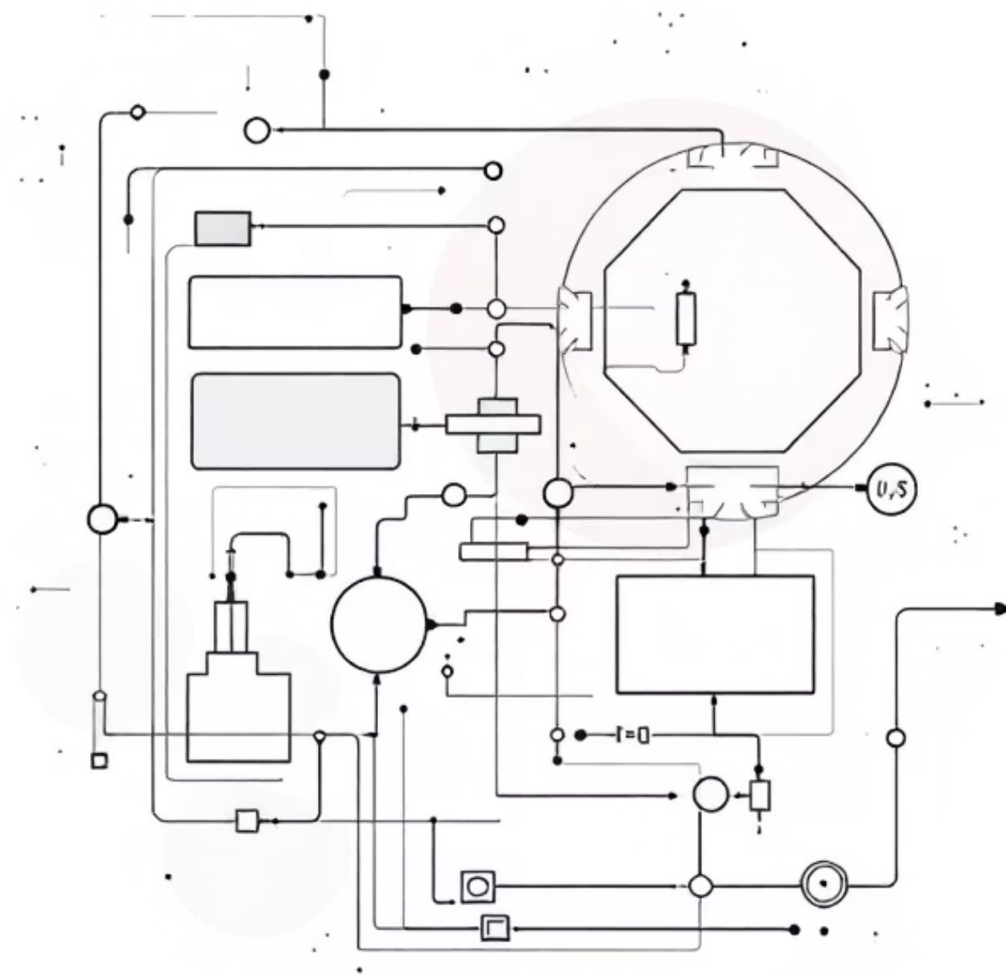

Finance lacks
real-time
commitment
tracking

0

Technical
Controls

Safety buffer
enforced by policy
only

Why VERITAS

Technical Solution for Structural Problems

VERITAS introduces a persistent, status-locked data model replacing scattered emails with a single source of truth.

Not Just Another Tool

Fills gap between spreadsheets and enterprise ERP systems

Custom workflows without SAP-level complexity

Who Uses VERITAS

Requester

Initiates purchase requests

- Frictionless submission
- Real-time status tracking
- No status-chasing needed

Procurement Officer

Manages vendor relationships

- Historical reliability scores
- Risk-adjusted cost calculations
- Structured quote comparison

Finance Officer

Defines budgets and workflows

- 100% visibility into committed spend
- Eliminate maverick spend
- Real-time budget validation

Core Features

Dynamic Workflows

Custom state-machine-driven approval chains

Vendor Intelligence

Historical reliability scoring and analytics

Notifications

Real-time alerts on status changes

Budget Validator

Hard-stop prevents safety buffer breaches

Multi-Currency

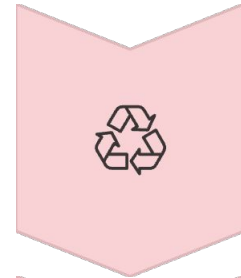

Real-time exchange rate conversion

Audit Ready

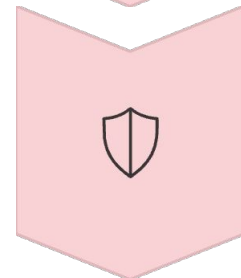

One-click PDF export of complete history

Business Value

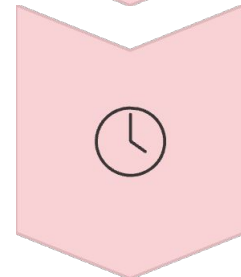

Variance Reduction

15% → <2% quote-to-invoice gap

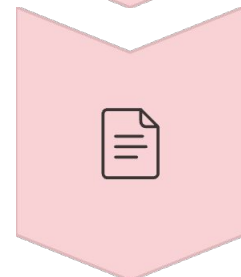

Financial Protection

Hard-stop prevents budget breaches

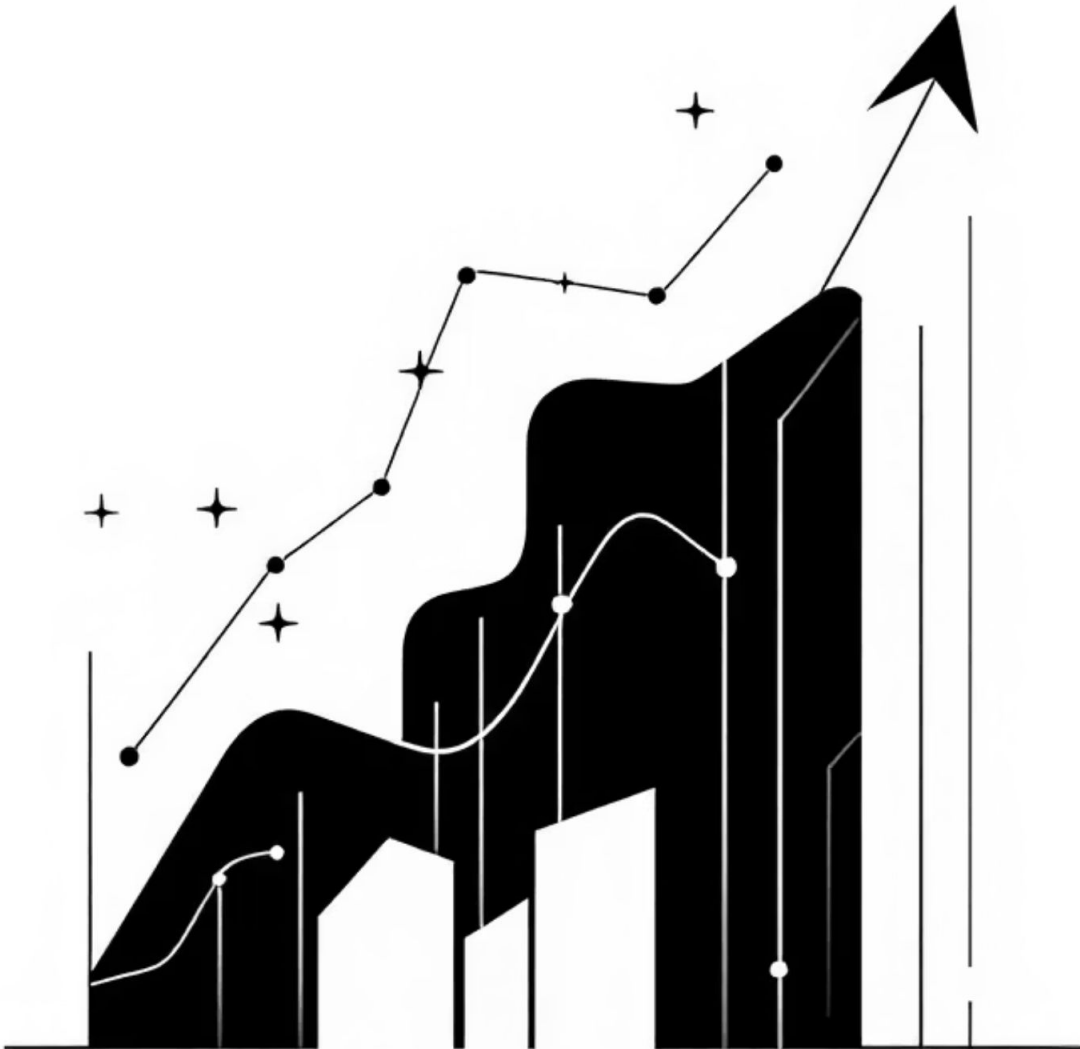

Time Savings

3-5 hours → 30 minutes per requisition

Audit Efficiency

1-2 days → 1 minute report generation

Technical Architecture

Four Integrated Views

Business View: Lifecycle creation and real-time visibility

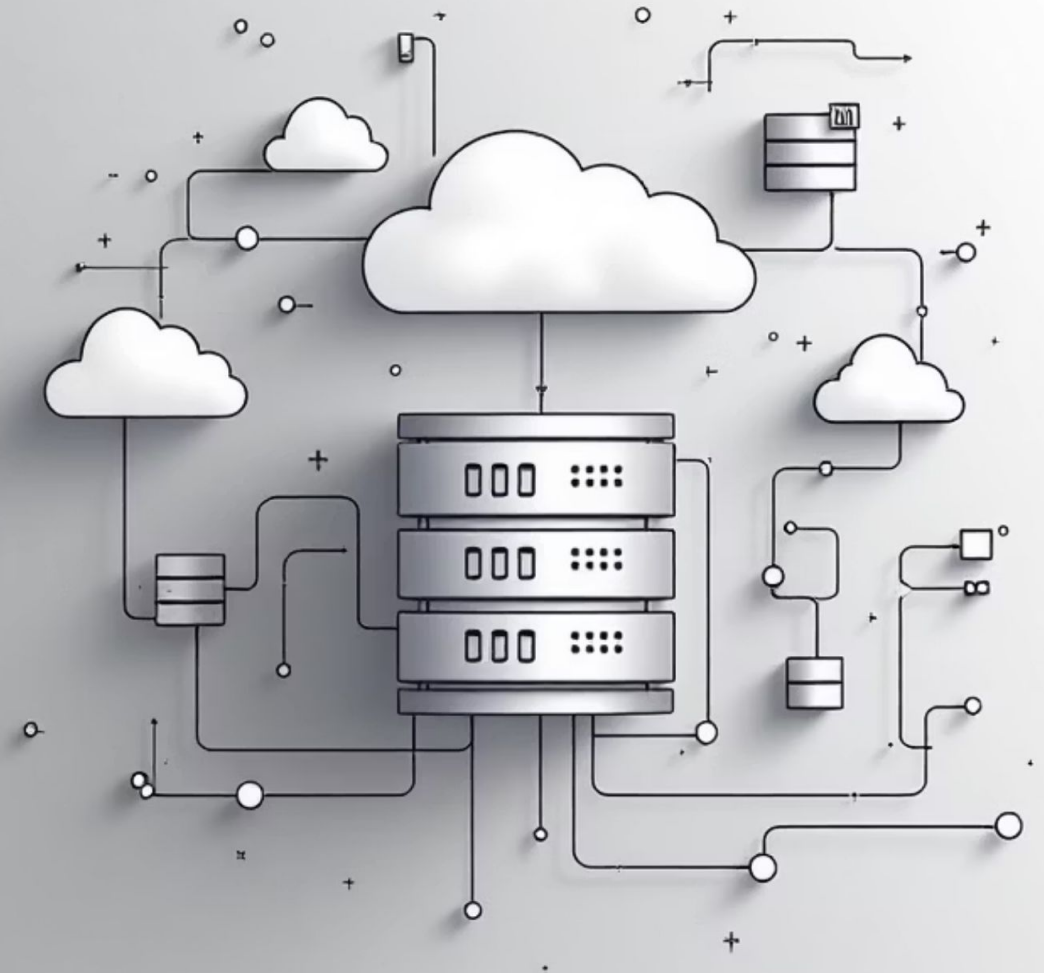

Process View: State-machine workflows replacing email chains

Data View: Intelligence engine with vendor analytics

IT View: Web app with normalized schema and REST API

Key Technologies

- Relational database with normalized schema
- Role-based access control (RBAC)
- JWT authentication with refresh tokens
- CI/CD pipeline for continuous delivery

Project Delivery

1

15 Weeks

6-person team, 900 total hours

2

Working Increments

Measurable progress each sprint

3

Target

Course completion with a well functioning software

"The process matters, not the tool. VERITAS just keeps it on track."
